MEGA-KEL-P®

TECHSHEET

Advantages

- **MEGA-KEL-P®** is a foliar solution formulated to support crop recovery from environmental stresses such as waterlogging and heat. It may also promote root development, fruit retention, and sizing, contributing to overall crop performance.
- By supporting nutrient assimilation and helping plants prepare for stress, it may contribute to healthier crops and improved crop performance.
- Its combination of phosphorus and amino acids supports photosynthesis and overall plant productivity.
- Additionally, it contains naturally occurring plant compounds that support cell division and elongation.

Compatibility

MEGA-KEL-P® can be mixed with most insecticides, herbicides, and fungicides. For best results, apply when plants have sufficient leaf area. If mixing with other products test for compatibility with a small quantity in a jar. **MEGA-KEL-P®** can contain coarse materials and may block fine filters in spray equipment. Use 180-micron (80 mesh) filters and nozzles.

Application Rates

Crop	Application
Orchard & Vines:	4–6 applications of 0.5–1 gal/acre from early leaf growth until post-harvest. Apply 1–2 gal/acre in spring, followed by 0.5 gal/acre per month during the active growing season.
Vegetables:	Monthly applications of 0.5–1 gal/acre during the active growth period.
Field Crops:	Foliar 2–4 applications of 0.5–1 gal/acre. Down the tube into soil 0.5–1 gal/acre.
Turf & Ornamentals:	0.5–1 gal/acre.
Repeat applications may be beneficial.	

Storage: Do not store in direct sunlight. Store in a locked area. Do not store mixed product.
